

Element Names & Symbols to be Familiar With

Your task over the next weeks is to become familiar with some of the more common elements that you will encounter in class, the textbook, and the world around you. Below is a list of the elements that I would like you to learn. In the weeks to come, you will be having several short quizzes to test your knowledge of these elements. The best way to study for these quizzes is to make flash cards each week. Save these flash cards, because we will have a test on the entire list later in the year.

Actinium	Ac	Neon	Ne
Aluminum	Al	Nickel	Ni
Antimony	Sb	Nitrogen	N
Argon	Ar	Oxygen	O
Arsenic	As	Phosphorus	P
Barium	Ba	Platinum	Pt
Bismuth	Bi	Plutonium	Pu
Boron	B	Potassium	K
Bromine	Br	Radium	Ra
Cadmium	Cd	Radon	Rn
Calcium	Ca	Selenium	Se
Carbon	C	Silicon	Si
Cesium	Cs	Silver	Ag
Chlorine	Cl	Sodium	Na
Chromium	Cr	Strontium	Sr
Cobalt	Co	Sulfur	S
Copper	Cu	Technetium	Tc
Fluorine	F	Thallium	Tl
Francium	Fr	Tin	Sn
Germanium	Ge	Titanium	Ti
Gold	Au	Tungsten	W
Helium	He	Uranium	U
Hydrogen	H	Xenon	Xe
Iodine	I	Zinc	Zn
Iron	Fe	Zirconium	Zr
Krypton	Kr		
Lanthanum	La		
Lead	Pb		
Lithium	Li		
Magnesium	Mg		
Manganese	Mn		
Mercury	Hg
